 MODERN DEPOT[®] SPAS

Modern Depot Spas

At Modern Depot Spas, our fundamental commitment to the industry has been to provide a simple, comprehensive, one source solution for our products that include the highest quality , value and innovation to our customer. Our outlook has earned us the position of leading whirlpool , hot tub and sauna in the industry with state-of-the-art product quality, and an unsurpassed reputation for reliability. With innovative design, expansion and development, Modern Depot Spas offers a complete line of products for whirlpool , hot tub and sauna. We ensure all our customer investment worth every penny.

Vision

Create a wonderful healthy lifestyle with our hot tub and sauna, making it as a need .

Mission

To be the first brand in the market in consumer heart. think hydrotherapy, think Modern Depot Spas

hydrotherapy water spas

Hydrotherapy, is a part of medicine and alternative medicine, in particular of naturopathy, occupational therapy and physiotherapy, that involves the use of water for pain relief and treatment. The term encompasses a broad range of approaches and therapeutic methods that take advantage of the physical properties of water, such as temperature and pressure, for therapeutic purposes, to stimulate blood circulation and treat the symptoms of certain diseases.

Hydrotherapy treatments are normally treated within a hospital's physiotherapy department. Usually a physiotherapist with specialist training will help out the exercise. Hydrotherapy practice includes either soaking in a warm water hot tub, walking in the warm pool, relax in the sauna room, bathing in steam room or even cooling with a cold splash. The practice of hydrotherapy can be traced back till 2000 years ago. Modern Depot Spas provide the full range of hydrotherapy technology, we bring health to you.

Technology

In addition to Aristech Acrylics' excellent gloss and color retention, our Bio-Lok[®] surfaces are naturally impervious to microbes, without the need of added chemicals. The non-porous nature of Aristech's Bio-Lok[®] sheet defends against the penetration and subsequent growth of microorganisms on its surface. Bio-Lok[®] hot tubs are shielded against microbes, easy-to-clean, durable, and do not contain any antimicrobial chemicals, pesticides or similar additives.

ARISTECH
ACRYLICS

Hot Tub health benefit

Relief pain

Our central nervous system's sensitivity is muted, as our body focuses its attention on the heat gain. This brings about temporary pain relief. This neurological affect can happen with any gradual increase or decrease of our body's temperature.

Cardiovascular

Soaking in a spa simulates exercise. It increases the heart rate, yet it doesn't increase blood pressure. The regular use of spas give us the health benefits of exercise but with less heart stress.

Healing

Hot tub raises the body's temperature and causes blood vessels to dilate, resulting in increased circulation and blood flow. Jets massages provides relief for muscle spasms. Improves joint flexibility. Helps decrease inflammation to damaged nerves and muscles.

Arthritis

A hot tub fulfils the need perfectly, providing the warmth, massage, and buoyancy that is so necessary to the well-being of arthritis sufferers. The buoyancy of the water supports and lessens stress on the joints and encourages freer movement. Water exercises may even act as a resistance to help build muscle strength.

Weight management

Soaking in the warm water raises the body's temperature and causes blood vessels to dilate, resulting in increased circulation and blood flow. Simulating mild exercise and improving our cardiovascular, automatically improve metabolism that help burn fat.

Diabetic

Patients with Type 2 Diabetes Mellitus were studied using a hot tub 30 minutes a day, 6 days per week. After only 10 days, patients required reduced doses of insulin, lost weight, showed distinct decreases in plasma glucose and glycosylated haemoglobin -New England Journal of Medicine (08-16-1999)

De stress

Studies shown that the combination of the hot water, the massage of the jets, and the feeling of weightlessness cansignificantly reduce both mental and physical stress and decrease anxiety.

Reduce wrinkle ,Smooth skin ,Enhanced collagen

MicroSilk patented process compress the oxygen from air into water and creates literally billions of these little bubbles that is 50 times smaller than the normal bubbles which is only 50 micron in size. It fill the water in spa up to 70% more oxygen than regular tap water.. The microbubbles penetrate gently into pores, deep cleansing, re-energizing and moisturizing our skin. Provide more oxygen to stimulate collagen production to moisturized and softened our skin.

Micro Silk

Micro Silk

Introduction

It's all about the Bubbles!

The patented MicroSilk® process combines pure air and water to create something truly remarkable. It all starts with the oxygen you breathe everyday. The patented process compresses the oxygen from air into water and creates literally billions of these little bubbles that is 50 times smaller than the normal bubbles which is only 50 micron in size. It fills the water in spa up to 70% more oxygen than regular tap water. It clouds the water and might look like a milk bath. Individually, the bubbles penetrate gently into pores, deep cleansing, re-energizing and moisturizing your skin.

Collagen is a main structural component of the inner layer of your skin, and it is responsible for its strength, structure, firmness and appearance. Unfortunately, as you age, your body undergoes changes that lead to a decrease in collagen production:

In age 20's, collagens are at their peak

In age 30's, the start of substantial decline of proteins in skin.

In age 40's, skin starts to feel thinner and skin can have increased redness.

In age 50's, skin's moisture is greatly decreased

The micro-bubbles of a MicroSilk® hydrotherapy, are able to stimulate and improve collagen production. Having healthy levels of collagen helps slow down and potentially reverse the aging process that starts in your mid-twenties and continues throughout your life.. This natural collagen helps plump the skin and remove wrinkles, giving you younger looking and healthier skin.

We call it FOUNTAIN OF YOUTH

Sauna Health Benefit

Detoxification

According to the Environmental Protection Agency (EPA), a person has 700 chemicals on average in their body, including rocket fuel and pesticides. The heavy metals such as lead, cadmium, mercury, arsenic, aluminum, nickel and many others. These metals accumulate in our bodies causing any imaginable health condition, symptom and disease, including cancer. These metals are present in our air, food and water. Treatment in sauna 30 minutes will help sweat these chemicals out of the body.

Kill parasites

Consistent near infrared sauna therapy is an ideal parasite treatment because it kills the parasites, the recurring parasite hatchlings and detoxes all the infections.

Enhanced immunity

Infrared Saunas enhance white blood cell function, thereby increasing immune response and the elimination of foreign pathogens and cellular waste products. It also removes accumulated toxins by improving lymph circulation. A 30-minute infrared sauna session causes a temporary 3° increase in body temperature. This increase has been shown to stimulate white blood cells.

Improve cardiovascular

Sauna enhanced circulation and oxidation of the tissues. Saunas are most helpful for cardiovascular rehabilitation because it lower elevated blood pressure and improve the elasticity of the arteries-just like exercise.

Skin rejuvenate

Sauna helps shuttle blood to the skin's surface, bringing oxygen and nutrients. DNA synthesis of fibroblasts, which affects the elasticity of skin, increased five-fold with infrared use. The result is younger-looking, more beautiful skin

Hyperthermia

Hyperthermia mean raising of body temperature, powerfully assists the body to kill bacteria, fungi, parasites and viruses. Hyperthermia also helps kill some types of abnormal cells that contain radioactive minerals, chemical toxins, toxic metals and other defective cells. Tumors, for example, tolerate heat poorly. Hyperthermia is a well-researched therapy for cancer. However, it is not a stand-alone cancer treatment.

Reduce blood pressure

German medical researchers concluded one session in an infrared sauna for over 1 hour can have significant reduction of blood pressure thanks to persistent peripheral vessel dilation. They also noted that blood viscosity was improved. Infrared saunas cause the release of nitric oxide, which relaxes blood vessels.

natural life

about sauna woods

Red Cedar

Name : Western Red Cedar, Giant Cedar (Thuja plicata)

Occurrence : North America. (Asia)

Wood colour : The sapwood is whitish and the heartwood flaming reddish brown to dark brown.

Properties

The excellent natural durability of Western Red Cedar heartwood is recognized throughout the world as being one of the most durable species in the marketplace. Western Red Cedar "heart wood" contains natural oils that act as preservatives to help the wood resist insect attack and decay. Western Red Cedar is naturally bacterial, fungal and mold resistant. Western Red Cedar fibers contain extractive oils that act as natural preservatives to help the wood resist rot and decay, making it excellent material for moist or humid environments. This makes aromatic Western Red Cedar the natural choice material for saunas. Western Red Cedar used in sauna construction is therapeutically aromatic, is generally satisfying to the senses and provides a true relaxing experience.

Maintenance

Western Red Cedar is free of pitch and resin, and it finishes to a richly glowing surface. Western Red Cedar contains water-soluble extractives that contribute to its color, durability and aroma. The presence of moisture on exterior surfaces can bring these extractives to the surface and leave a reddish brown stain after the water has evaporated. The stains can be easily removed with mild detergent and water. Permanent stains can be removed by resurfacing or sanding the cedar. This process will return the natural beauty and unique aromatic properties of the cedar.

Environmental friendly

We Modern Depot Spas sauna Western Red Cedar wood are environmentally, socially and economically responsible manner with internationally recognized environmental certification initiative ISO 14001 Environmental Management Systems compliance.

Hemlock

Name: Hemlock (Tsuga heterophylla). Also known as western hemlock.

Occurrence: Western USA, Western Canada and parts of Alaska.

Wood colour: Reddish grey to light yellowish brown softwood.

Properties

Western Hemlock is valued for its good working properties and can be machined easily. Its excellent treatability makes it a preferred species for treated wood applications where density and high strength are important. Western hemlock is often sold together with Amabilis Fir under the name Hem-Fir. Hemlock is commonly used due to inexpensive. Western hemlock is firmly established as an outstanding wood for mouldings and is also used for interior woodworking. Other uses include: doors, windows, interior finish, floors, suspended ceilings, ladders, and other purposes where a high-grade softwood is needed.

Maintenance

Western hemlock lumber is dried according to end-use and customer specifications. Kiln drying inhibits natural staining of the wood, improves its strength and stiffness, enhances its appearance, and increases its resistance to decay and attack by insects.

Environmental friendly

We Modern Depot Spas sauna Western hemlock are environmentally, socially and economically responsible manner with internationally recognized environmental certification initiative ISO 14001 Environmental Management Systems compliance.

You deserve a brand that is equally passionate about making your healthy lifestyle dreams a reality

Quality

Quality Isn't a Luxury. It's a Standard. Every Modern Depot Spas product is crafted with the utmost attention to quality and is rigorously tested to the highest industry standards.

Design

We are home proud too. Our designer sketch the model thousand times not only to show spectacular design u deserve but also the comfort we insist.

Innovation

Because You Deserve the Best. Our products incorporate the latest technological advancements and innovations.

Value

Get the Most for Your Money. At Modern Depot Spas , we appreciate the value of a dollar. Every penny count.

Service

Customers Come First. We worked hard to earn our reputation and are committed to keeping it. We stand behind each of our products because we care. We care how you feel.

Team

Great Products Start with Great People. Each of us in Modern Depot Spas were professional train from time to time, to provide updated and the best service to each of our customer. We listen, We care.

SAUNA

HIKURANGI Infrared

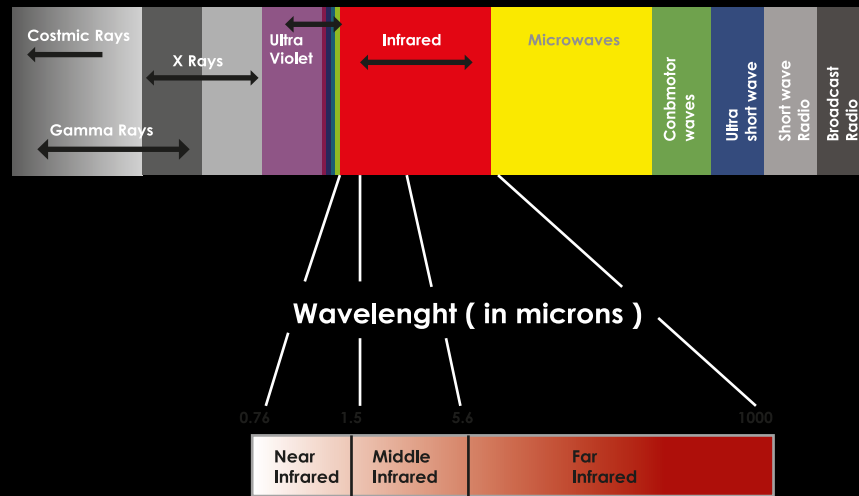

about HIKURANGI Infrared

HIKURANGI infrared were specifically developed for infrared saunas, therefore, making it special that able to produce the whole range of infrared wavelengths . Unlike the other infrared sauna in the market unable to provide the full range of the infrawave. This unique technology has been the most efficient among those available on the market nowadays. It ensures the deepest penetration into the tissues (2-6mm) with the total range of infrared wavelength types (Type A, B and C IR radiation) and enjoying the benefit from it.

The HIKURANGI infrared lamp containing the heater element with a special parabolic mirror developed over long periods of experimentation. The mirror reflects infrawaves to the cabin enclosure with maximum efficiency, ensuring a perfect treatment and the controllability of the infrared rays intensity. The strain on your body can effectively be controlled through the position of the body and the heating element.

Hikurangi infrared providing a difference sauna experience, a sensation you could dream of.

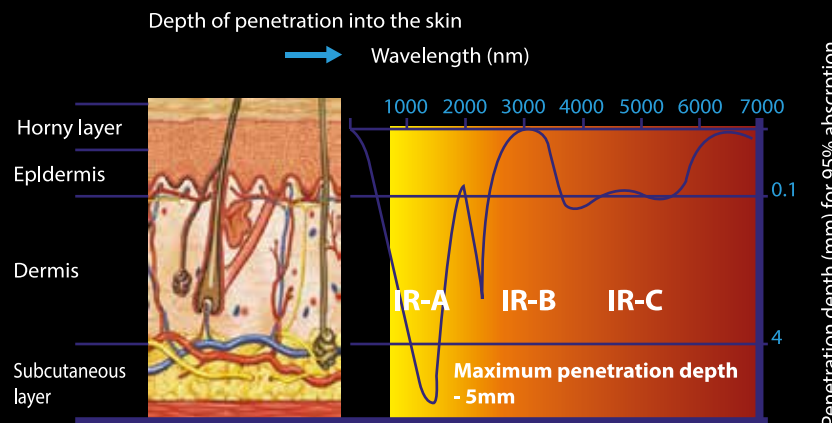

compare chart of near , medium and long infrared

Type A - Infrared short-wave radiation (near infrared): Near infrared radiation corresponds to the sun's IVA radiation. This ensures the efficient and pleasant warming of the top layer of your skin (also called subcutaneous tissues) which is 5 mm deep. This results in a much higher temperature sensation of the body than the actual temperature of the enclosure.

Type B - Infrared medium-wave radiation (medium infrared): medium infrared provides five times more IVB radiation than the sun. The IVB radiation ensures penetration into the depth of 3-4 mm in the skin, being responsible for the consistent warming of the subcutaneous tissues.

Type C - Infrared long-wave radiation (Far-Infrared): in the nature, rays like these do not reach the surface of the Earth. The IVC waves only heat up the skin's surface, without penetrating into the skin's lower tissues.
